

Mini X-Treme Box

Coleman Cable's Mini X-Treme Box™ provides more compact and less costly work-site power distribution than our popular full size models. Used along with our restoration adapters, these units are ideal for disaster restoration work where the only available power is from range outlets, dryer outlets or portable generators. Or, they can be used in any situation where a more compact, easier-to-handle unit is desired to safely expand and distribute power on jobsites.

30A, 125/250 V generator and dryer outlets, and 50 A, 125/250 V range outlets can now be converted to an extremely compact, portable GFCI and breaker protected power distribution unit, providing standard, usable 125V power. The Mini X-Treme™ Box offers a NEMA Type-1 enclosure with 4 NEMA 5-20R 20A, circuit breaker and GFCI protected outlets on the front panel; 4 NEMA 5-20R 20A, circuit breaker and GFCI protected outlets on back panel; and 1 NEMA L14-30P inlet on the side panel.

The Mini X-Treme Box compliments Coleman Cable's line of temporary Power Distribution Boxes; Extension Cords; Generator Cords and Adapters.

Features & Benefits

- OSHA and NEC Compliant, c(ETL)us Listed, and Certified to CAN/CSA
- Reduces electrical hookup and labor time
- 8 overload, circuit-breaker protected 20 amp straight blade outlets.
- All outlets GFCI protected with open neutral and over-voltage protection
- Compact size for ease of use
- May be used in vertical or horizontal positions
