

Moonrays Landscape Lighting Program

The Moonrays® Landscape Lighting program truly has something for everyone's outdoor space. From whimsical accent lights, to mission-style pathway solar lights inspired by classic architectural elements, to complete low-voltage lighting sets for an entire yard, the program covers every segment and price point of the very important and hot outdoor-living space market. A full line of accessories, including replacement batteries and bulbs, provides consumers what they need to keep the lights glowing. Moonrays continuously strives to bring unique designs to market, providing value and style that sets this brand apart from others and gives backyards and gardens their own one-of-a-kind look in the neighborhood.

The comprehensive website www.Moonrays.com provides more information such as a full line listing, product photos, installation instructions and retailer locations.

Features & Benefits

- **Low voltage** – Easy to install. Provides consistent lighting all year long. Use as security and/or decorative lighting. Highlight architectural or natural features such as towering trees and archways. Choose from a variety of Moonrays styles.
- **Solar Landscape and Accent lights** – Quick to install. Provides light in places where electricity is unavailable, including near water. Adds ambient illumination to back yards, gardens, pathways, steps, anywhere a touch of light is desired. Choose from a variety of finishes, shapes and styles to complement and enhance any outdoor space. Simple and fun way to decorate – lights can easily be moved around and will fit in small spaces. Zero electricity costs, great for the environment since they are powered by the sun, lights turn on automatically at dusk and off at dawn and recharge in sunlight.

Home Landscape Use and Benefits

Landscape lighting not only enhances the natural beauty of a home's landscape, it also provides illumination for security and safety, especially around walkways and remote areas. With the emergence of the outdoor living room and the addition of ponds, hot tubs and waterfalls to backyards, ambient light is very important. Low voltage and solar provide simple, low-cost lighting solutions for the homeowner.

The recently expanded **Moonrays low-voltage line** includes kits and individual lights in several stylish finishes, including antique bronze and redwood. Specialty deck lights and beautiful designs influenced by art and architecture provide plenty of choices for this popular outdoor lighting option.

The **Moonrays solar garden light line** is all about style, from classic to contemporary, eye-catching designs such as butterfly shapes and mosaic globes and beautiful workmanship employing stained glass and intricate scrollwork. Consumers can choose from many options to customize their gardens – lighthouses, animals, flowers and more. Specially-designed deck lights, post lights and spotlights help round out the line, providing illumination options for every corner of the yard, from water features to walkways. Style choices include lights with shepherd hooks and/or ground stakes.

Moonrays accessories provides all that is needed to maintain and update Moonrays lighting fixtures including bulbs, batteries, low voltage wire and control boxes.
