

## Timers and Home Controls

CCI offers a broad line of Woods® brand timers which encompasses both the consumer and industrial market sectors, that are complete with features important to segments of each market. The wide variety of timers for consumers includes mechanical, digital, 24-hour or 7-day, dual-outlet, vacation, in-wall, and outdoor timers, including photocell controls, power stakes and heavy duty versions. In addition, the line includes wireless home controls, which is a fast growing and important channel for homeowners and the technology savvy.

To address the industrial channel's need for commercial-grade timers and photocells, the Woods industrial timer line includes multi-volt time switches with sturdy lockable boxes, and hardwire photocells.

### Features & Benefits

- Time water heaters, lights, holiday decorations, appliances and electronics to turn on and off at set times for convenience and energy savings.
- Many timer setting options = 7-day, 24-hour, photocell (dusk to dawn operation), random on/off settings.
- Wireless home controls allow operation of lights and appliances through walls and floors, even from a car. Great for the elderly. Also ideal for effortlessly turning on and off holiday decorations and activating house lights from the driveway for a lighted home after dark.
- Outdoor timers are durable and make managing decorative and security landscape lighting easy; also use for fountain pumps and animated holiday decorations.
- In-wall timer options: spring wound and digital with varying maximum setting times and color options.
- Hardwire photocells for industrial settings minimize manpower and save money by turning lights off automatically. Use on sports fields, billboards, outbuildings, and parking lots.

## Timers and Home Controls

High electricity costs, home security and convenience are all relevant to the homeowner. Household timers, both indoor and outdoor, help consumers cut down on wasted energy use and consequently save money on electricity and help the environment. They provide an extra layer of security when lights turn on in an unoccupied home and make life more convenient by turning appliances on and off automatically at set times. CCI's complete home timer line provides many models with such features as to-the-minute digital setting, settings-per-day options, nightlights and power strip models, dual outlets, and never-lose pins.

The industrial-grade line features timers and photocell controls appropriate for use in any commercial setting. Lockable plastic-box time switches and a variety of hard-wire photocell options give this channel many choices for such applications as sports fields, office buildings, tennis courts, commercial security lights and parking lots.
